

**ENVIRONMENTAL PROTECTION  
POLICY OF GRUPA KĘTY S.A.  
and subsidiary company  
ALUFORM Sp. z o.o.**

**Mission for Kęty:**

**For the future... “ensuring Employees Growth, Effective Employment of Natural Resources, Safety, the Environmental Protection, Long-Term Economic Value”.**

**It is implemented by adopting the environmental management system to meet the following commitments:**

We take full responsibility for the impact of our operations, in the environment. We comply with constraints stemming from the regulations of the law. We focus on solutions eliminating an adverse impact at the core of its origin.

We adjust the accounting system to the requirements relating pro-ecological operations. “Green accounting” We apply tools, that help us to make decisions relating the implementation of investment projects.

We publish to the interested parties an annual environmental report that contains an assessment of impact on the environment and information on the implementation of legal requirements.

We undertake actions to improve results of our environmental operations and other entities that come within the sphere of our impact.

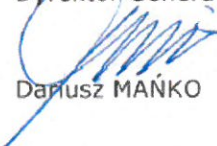

Our goal is to effectively use resources and limited emissions. We have been implementing a program of optimising consumption of raw materials that consists usage of recycled materials.

We undertake initiatives leading to the promotion of greater ecological responsibility. Our focus is based on supporting local initiatives for the environment. Through periodic training we enhance awareness among our employees.

**The Management Board of the Group of KĘTY S.A. provides necessary resources to implement the environmental policy and confirms that it corresponds with the adopted strategy, that has been communicated, understood and applied.**
